

RELX Group Environmental Challenge Application Form

First and second prize in the RELX Group Environmental Challenge will be awarded to the two projects that best demonstrate how they can provide sustainable access to safe water where it is presently at risk and/or access to improved sanitation. Projects must have clear practical applicability, addressing identified need, and advance related issues such as health, education, or human rights.

The RELX Group Environmental Challenge is open to individuals or organisations operating in the not-for-profit and for-profit sectors. Projects must advance sustainable access to safe water where it is presently at risk and/or access to improved sanitation and include the following criteria:

- * Be replicable, scalable and sustainable and set a benchmark for innovation
- * Have practical applicability
- * Address non-discrimination/equity of access
- * Involve and impacts a range of stakeholders
- * Have local/community-level engagement

Please ensure you fill out the application in English, and explain key terms and acronyms where appropriate.

Country

Executive summary (1700 characters)

Describe the project and make clear its primary aims.

Organisation/Applicant description (1000 characters)

Provide a description of the organisation represented by the applicant; if the applicant is not part of a formal institution, provide an overview of professional background.

Project background (3700 characters)

Please provide a description of the project background and include answers to all of the following questions:

- a) What is the demonstrated need for the project
- b) How does the project support the national government's policy and/or stated targets on sustainable access to safe water and improved sanitation in the country where the project is to take place
- c) How does the project meet regulatory or other legal compliance requirements in the location(s) where it will be carried out
- d) How does it set a benchmark for innovation

Project goals (3700 characters)

Describe how the project advances sustainable access to safe water where it is presently at risk and/or access to improved sanitation and specifically how it:

- a) Uses improved technologies
- b) Has practical applicability and addresses identified need
- c) Advances related issues such as health, education, or human rights
- d) Promotes non-discrimination/equity of access
- e) Involves and positively impacts a range of stakeholders
- f) Has local/community-level engagement

Project outcomes (2000 characters)

Describe the expected project outcomes including number of people likely to be served over the short and long term.

Sustainability (1700 characters)

Provide information regarding the long-term technological, economic, social and environmental sustainability of the project highlighting how it is replicable and scalable.

Project plan (1700 characters)

Provide a development plan explaining how you will undertake the project, including:

- a) The individuals/organisations responsible for completing the work necessary
- b) If this is not a new project, provide a history of the project, objectives and achievements to date

Budget (2000 characters)

Please provide a full budget for the project in US Dollars highlighting any money already raised and plans to close any funding gap between the prize money of US\$50,000 (first prize) or US\$25,000 (second prize) and your total budget costs.

Competing interests (1400 characters)

Please disclose all of applicant's actual or potentially competing interests that might reasonably be perceived as relevant to the project proposed in this application. [For purposes of this application, a "competing interest" is an interest of any kind (financial or non-financial) that could undermine the objectivity, integrity or perceived value of the project through its potential influence on behaviour or content or from perception of such potential influences.]
