Directors' report

General

The Board of Directors (hereinafter also referred to as Directors and/or Board) present their report, together with the financial statements of RELX Finance B.V. (the *Company*) for the year ended 31 December 2025.

Principal activities

The Company is a finance company with the main objective to raise funds, including the issue of bonds, loan notes, promissory notes or other securities, to finance affiliates in the group comprising RELX PLC and its subsidiaries, joint ventures and associates (together known as *RELX*).

RELX, of which the Company is a part, maintains a range of borrowing facilities and debt programmes to manage its funding requirements at competitive rates. Debt is issued to meet the funding requirements of various jurisdictions and in the currency that is needed, recognising that debt can act as a natural hedge of earnings and net assets in currencies other than the RELX reporting currency. The Company was set up during 2015 to enable an increased proportion of RELX's debt portfolio to be issued and denominated in Euros, to better match the currency mix of earnings and operating cash flows.

The Company funds itself primarily with a portfolio of long-term borrowings, mainly issued in the Eurobond market. It also maintains Euro Commercial Paper and US Commercial Paper programmes under which it issues short-term borrowings based on its funding needs. All of the Company's long-term and Commercial Paper borrowings are fully and unconditionally guaranteed by RELX PLC, the Company's ultimate parent company.

Financial statement presentation

The financial statements of the Company have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board and adopted by the EU.

Developments during the financial year

The profit before tax for the year was €4,446k (2024: €3,866k). The increase in profit before tax in 2025 is primarily due to a €233k net gain on fair value hedge relationships, and a €238k decrease in administrative expenses.

The principal amount lent to an affiliate at the end of the year was €4,164 million (2024: €4,150 million).

There were no changes in the long-term debt portfolio in the year, and no issuance under the Commercial Paper programmes. As a consequence, the Company's cash flows during the year have related primarily to payments and receipts of interest.

RELX Finance B.V.
Amsterdam

The Company charges interest on the amounts lent on to an affiliate, including a mark-up, and the interest income received covered the interest and administrative expenses of the Company in full.

Short-term market interest rates decreased during 2025 relative to their peak in 2024, however there remains variability in the forecast for interest rates in later years. Although the majority of the Company's borrowings are at a fixed rate of interest, bonds totalling €750 million (2024: €750 million) had been swapped to floating rate on issuance and are in fair value hedge relationships. Changes in forecast interest rates had resulted in mark-to-market gains in these interest rate swaps by the end of 2024. These gains were partly reversed during 2025 as some of the unrealised gains were realised through reduced interest paid on the interest rate swaps, and from an increase in forecast market interest rates. The mark-to-market movements for the derivatives were largely offset by changes in the fair value adjustments to the bonds under fair value hedge accounting, with any net gains or losses being the result of hedge ineffectiveness that will reverse over the life of the hedge relationships if they are held to maturity. In total, in 2025 there were mark-to-market losses on the related interest rate derivatives of €14,338k (2024: gains of €8,252k), offset by gains in the fair value adjustment included in the carrying value of the bonds of €14,571k (2024: losses of €8,246k).

The Company is in a net asset and net current asset position at 31 December 2025.

Prospects

The Company has a bond maturity falling due of €750 million in May 2026, and will likely issue in the bond market during 2026 to finance this maturity and any amount to reflect the affiliate's expected funding needs for the short to medium term. The Company has no further bond maturities until May 2027.

The Directors do not expect any change in the principal activity of the Company, which will continue to provide funding to a RELX affiliate. The Company assesses its borrowing needs based on the affiliate's requirements for funding, which is itself primarily dependent on any changes in the continuing business activity in the RELX sub-group in the Netherlands or on any corporate restructures or portfolio changes in that sub-group. The overall level of funding stayed the same in 2025, however this has recently increased in order to fund certain loan repayments by the affiliate to the RELX treasury company in Ireland and in relation to further investments in subsidiaries made by the affiliate. On the basis of the stable nature of the businesses in the Netherlands sub-group, no further significant change is expected in respect of its funding needs for the foreseeable future.

The long-term recoverability of the lending provided to a RELX affiliate is in part linked to the continued financial strength and performance of RELX as a whole, but in particular to the RELX sub-group in the Netherlands, which has continued to perform strongly. The Company does not carry out trading activities, has no employees and no significant third-party creditors. As set out below, the nature of the Company's business and the terms of its lending activities therefore results in minimal exposure to prevailing economic, geopolitical and market factors.

RELX Finance B.V.
Amsterdam

Board of Directors

The Board currently comprises Suzanne Perry, Claudia Last-Viskil, Jan bij de Weg, Paolo Garrone and Simon Thompson.

Diversity

The Board has taken notice of the Dutch legislation on diversity, regulated in the Dutch Civil Code which has come into effect for reporting periods starting on or after 1 January 2022.

The Board

On 31 December 2025, the Board consists of 5 managing directors of which 3 male (60%) and 2 female (40%). The Company aims to have at least 30% men and women in the Board and/or “sub-top” where applicable.

Scope of sub-top

The Company has defined the sub-top as follows: the senior leaders who have a management grade of 17 and above. This definition of sub-top is in line with the definition of RELX senior leaders set out in note 1 on page 36 of the RELX 2025 Annual Report.

On 31 December 2025, the Company had 0 employees. As a result, there are no persons that fall within this definition of the sub-top.

Targets & Plans

The Company aims to have at least 30% men and women in the board of directors and/or “sub-top” where applicable and has met its target.

RELX reports its targets, plans and if applicable the scope of its “sub-top” per each of its “large” Dutch companies to the Social and Economic Council of the Netherlands (SER) (based on the SER’s format). RELX acknowledges the benefits that diversity can bring to the effectiveness of board discussions through the incorporation of different perspectives and ideas and, as a result, the quality of board decision-making. RELX believes that the environment in which it operates should be one that respects individuals and their contributions, regardless of any member’s gender, ethnic origin, disability, nationality, age, sexual orientation or any other individual characteristic. Diversity is best served through careful consideration of all of the knowledge, experience, skills and backgrounds of each individual director candidate in light of the needs of the board without focusing on a single diversity characteristic. Notwithstanding the above, all appointments must be made on merit.

Diversity generally will be taken into consideration when evaluating the skills, knowledge and experience desirable to fill each board vacancy. More information on diversity and inclusion can be found in the RELX 2025 Annual Report, in the Report of the Nominations Committee, which reports on RELX’s policy on diversity and inclusion.

RELX Finance B.V.
Amsterdam

During 2025, RELX has continued to implement its inclusion strategy to advance progress towards its 2020-2025 inclusion goals. Further details of RELX strategy and progress towards fulfilling I&D initiatives is set out in the People section of the RELX's Corporate Responsibility Report on page 49 to 51 of the RELX 2025 Annual Report.

A breakdown of gender diversity across RELX's management and senior leadership is set out on page 51 of the RELX 2025 Annual Report.

Risk management

The Company has identified and evaluated its principal risks, the controls in place to manage those risks and the levels of residual risk accepted. The Company's Directors monitor the overall risk profile of the Company. In addition, the Directors are responsible for determining clear policies as to what the Company considers to be acceptable levels of risk. These policies seek to enable people throughout the Company to use their expertise to identify risks that could undermine performance and to devise ways of bringing them to within acceptable levels. Where the Directors identify risks that are not acceptable, they develop action plans to mitigate them with clear allocation of responsibilities and timescales for completion and ensure that progress towards implementing these plans is monitored and reported upon.

The Company is exposed to financial risk through its financial assets and liabilities. The key financial risks are credit risk and liquidity risk. The Company's exposure to interest rate risk and foreign exchange risk have been mitigated or are limited to an acceptable low level.

Credit risk is principally attributable to amounts owed by affiliate companies, with funding provided to RELX Overseas B.V., the Company's intermediate parent company.

The Company's risk exposure is therefore linked to the performance and financial strength of RELX as a whole, and of the RELX sub-group in the Netherlands in particular. The Company's external borrowings are guaranteed by RELX PLC. The Directors consider these matters when assessing the Company's credit risk, including the disclosures provided by RELX PLC on Going concern and the Viability Statement included in its Annual Report.

Liquidity risk is also linked to the wider financial position of RELX. The repayment of the Company's borrowings as they fall due is funded by new borrowings or by amounts receivable from RELX Overseas B.V. The liquidity of RELX Overseas B.V. is supported by the ability (together with certain other RELX affiliates) to draw down on the \$3,500 million (€2,982 million) committed bank facility which was undrawn as at 31 December 2025 (31 December 2024: undrawn). In November 2025, the previous committed bank facility was cancelled and replaced with the new facility on similar terms and maturing in November 2030.

On the basis of these factors and consideration of the RELX PLC Annual Report disclosures for the year ended 31 December 2025, the Directors continue to view the Company's credit risk and liquidity risk exposures to be acceptable. RELX's business areas continue to perform strongly, it is well-positioned to manage its business risks and has substantial liquidity headroom on its borrowing facilities.

RELX Finance B.V.
Amsterdam

The Company is inherently exposed to concentration risk in respect of the entirety of its loan receivables being with a single counterparty, RELX Overseas B.V. This is unavoidable given it is the Company's principal activity, however the risk is mitigated by the diverse nature of the businesses of the RELX sub-group in the Netherlands, as described above.

The Company's exposure to interest rate risk is mitigated by issuing borrowings at fixed rates of interest, or, where borrowings have been swapped to floating rates through the use of interest rate derivatives or issued at floating rates, by lending to affiliate companies at floating rates of interest. The Company does not have significant exposure to foreign exchange risk because the majority of its borrowings and the amounts receivable from affiliate companies are denominated in Euros, the Company's functional currency. Where borrowings are issued in foreign currencies (such as the US dollar) they are hedged back to Euros using forward foreign exchange contracts. The Company has no other significant transactions denominated in foreign currencies.

In addition, the directors of RELX PLC undertake ongoing fraud risk assessments and the Directors of the Company have not identified any specific fraud risks in relation to the Company. The Company limits its exposure to fraud risks by maintaining a robust controls environment and taking reasonable steps for the prevention and detection of fraud and other irregularities through these controls. Furthermore, the Company has its own audit committee which maintains oversight of the control environment and other matters covering fraud risk.

Financial statements and accounting records

The financial statements provide a true and fair view of the state of affairs of the Company as of 31 December 2025 and of the profit in 2025. In preparing the financial statements, the Board ensures that suitable accounting policies, consistently applied and supported by reasonable judgements and estimates, have been used and applicable accounting standards have been followed. The Board is responsible for keeping proper accounting records, which disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that the financial statements comply with the law. The Board has general responsibility for taking reasonable steps to safeguard the assets of the Company and to prevent and detect fraud and other irregularities.

Applicable accounting standards have been followed and the Company's financial statements are prepared using accounting policies which comply with International Financial Reporting Standards as issued by the International Accounting Standards Board and adopted by the EU.

Audit committee

The Company has its own audit committee (the *Committee*) which comprises a majority of Non-Executive Directors of RELX PLC who are independent of the Company. The Committee is charged in particular with:

- the monitoring of the financial-accounting process and preparation of proposals to safeguard the integrity of said process;
- the monitoring of the efficiency of the internal management system, the internal audit system and the risk management system with respect to financial reporting;
- the monitoring of the statutory audit of the annual accounts, and in particular the process of such audit; and

RELX Finance B.V.
Amsterdam

- the selection and appointment of the external auditor with respect to the statutory audit of the annual accounts.

There were no specific items requiring the detailed attention of the Committee in the period. In discharging its responsibilities in respect of the financial statements for the year ended 31 December 2025, as well as considering the financial statements as a whole, the Committee has received regular updates as set out in the Report of the Audit Committee in the RELX 2025 Annual Report which are not included within these financial statements. This included regular updates from the RELX Group Treasurer on RELX's financial position including liquidity, credit ratings and ability to access debt capital and review of the going concern and viability assumptions for RELX PLC.

The Committee recommended the approval of the financial statements of the Company at its general meeting.

Share capital

All issued shares are fully paid up and carry no additional obligations or special rights.

Directors' responsibility statement

Each of the Directors confirms, to the best of their knowledge, that

- the financial statements, prepared in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board as adopted by the EU, give a true and fair view of the financial position and profit or loss of the Company; and
- the Directors' report includes a fair review of the development and performance of the business during the financial year and the position of the Company as at 31 December 2025 together with a description of the principal risks and uncertainties that it faces.

Neither the Company nor the Directors accept any liability to any person in relation to the Annual Report except to the extent that such liability arises under Dutch law.

Disclosure of information to auditors

As part of the process of approving the Company financial statements, the Directors have taken steps to ensure that all relevant information was provided to the Company auditors and, so far as the Directors are aware, there is no relevant audit information of which the Company auditors are unaware.

Going concern

The Directors, having made appropriate enquiries, consider that adequate resources exist for the Company to continue in operational existence for the foreseeable future and that, therefore, it is appropriate to adopt the going concern basis in preparing the 2025 financial statements. Further details regarding the adoption of the going concern basis can be found in the statement of accounting policies in the financial statements. The Directors have assessed the relevant factors surrounding going concern, including the sufficiency of committed bank facilities available to other companies in the RELX group that back up the group's short-term borrowings, and concludes that there are no

RELX Finance B.V.
Amsterdam

material events or uncertainties that may cast significant doubt about the ability of the Company to continue as a going concern.

The Company does not carry out any trading activities, has no employees and is in a net asset and net current asset position as at 31 December 2025. The Directors assess the recoverability of the assets the Company holds, being primarily a receivable from a RELX affiliate in the Netherlands. This is in part linked to the continued financial strength and performance of RELX as a whole, which has assessed itself to be a going concern on the basis of the strong performance of its four business areas in 2025, being well-positioned to manage its business risks and having substantial liquidity headroom on its borrowing facilities.

Market interest rates have risen significantly in recent years, which has increased the funding cost on the relatively low proportion of the Company's borrowings which pay a floating rate of interest. The cost of refinancing the Company's long-term borrowings as they mature over time is also likely to increase as a result. These factors do not have a significant impact on the Company because it passes on its own funding costs in full to its loan counterparty. As noted above, RELX as a whole has affirmed its long-term viability notwithstanding the higher interest rate environment.

Accordingly, the Directors have continued to adopt the going concern basis in preparing the financial statements.

Auditors

EY Accountants B.V. (EY) are the auditors of the Company in respect of the 2025 audit.

Subsequent events

The Directors have determined that there are no subsequent events requiring disclosure.

Notes to the Financial statements

For the year ended 31 December 2025

1. General

Activities

RELX Finance B.V. (the Company) is a finance company with the main objective to raise funds, including the issue of bonds, loan notes, promissory notes or other securities, to finance affiliates in the RELX group. The Company is a wholly-owned subsidiary of RELX Nederland B.V. and has its registered office and place of business at Radarweg 29, Amsterdam.

2. Basis of preparation and accounting policies

Summary of significant accounting policies

The Company's financial statements are prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board as adopted by the EU and Part 9 of Book 2 of the Dutch Civil Code. The accounting policies below are applied throughout the financial statements and are unchanged from those applied in preparing the financial statements for the year ended 31 December 2025.

The financial statements are presented in Euros and all values are rounded to the nearest thousand (€000), except when indicated otherwise. The Company's functional currency is Euros.

The financial statements have been prepared on the historical cost basis, except for financial instruments that are measured at fair values at the end of each reporting period, as explained in the accounting policies below.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement purposes in these financial statements is determined on such a basis.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2 or 3 of the IFRS 13 – *Fair Value Measurement* fair value hierarchy based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

RELX Finance B.V.
Amsterdam

The Company presents its cash flows from operating activities using the direct method, in which major classes of operating cash receipts and payments are disclosed.

Going concern

The Company provides funding for the activities of RELX. The Directors have assessed the relevant factors surrounding going concern, including the sufficiency of committed bank facilities available to other companies in the RELX group that back up the group's short-term borrowings, and concludes that there are no material events or uncertainties that may cast significant doubt about the ability of the Company to continue as a going concern. Accordingly, the Directors have continued to adopt the going concern basis in preparing the financial statements.

The Company does not carry out any trading activities, has no employees and is in a net asset and net current asset position as at 31 December 2025. The Directors assess the recoverability of the assets the Company holds, being primarily a receivable from a RELX affiliate in the Netherlands. This is in part linked to the continued financial strength and performance of RELX as a whole, which has assessed itself to be a going concern on the basis of the strong performance of its four business areas, being well-positioned to manage its business risks and having substantial liquidity headroom on its borrowing facilities.

Market interest rates have risen significantly in recent years, which has increased the funding cost on the relatively low proportion of the Company's borrowings which pay a floating rate of interest. The cost of refinancing the Company's long-term borrowings as they mature over time is also likely to increase as a result. These factors do not have a significant impact on the Company because it passes on its own funding costs in full to its loan counterparty. As noted above, RELX as a whole has affirmed its long-term viability notwithstanding the higher interest rate environment.

Taxation

The Company is part of a fiscal unity for corporate income tax purposes and for that reason it is jointly and severally liable for the tax liabilities of the fiscal unity as a whole. The head of the fiscal unity is RELX Overseas B.V. Corporate income taxes are calculated as if the Company was an independent taxable entity.

Corporate income tax is calculated at the applicable rate on the result for the financial year, taking into account permanent differences between profit calculated according to the financial statements and profit calculated for taxation purposes, and with which deferred tax assets (if applicable) are solely valued insofar as their realisation is likely.

Financial instruments

Financial instruments comprise loan receivables, cash and cash equivalents, payables and accruals, borrowings and derivative financial instruments.

Financial assets and liabilities are initially recognised on the date that the Company becomes a party to the contractual provisions of the instrument. A financial asset is derecognised when the rights to receive cash flows from the asset have expired. A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expires.

RELX Finance B.V.
Amsterdam

Receivables from and loans to affiliated companies and other receivables are recorded initially at fair value and subsequently carried at amortised cost, after allowing for any impairment losses calculated using the expected credit loss model on a forward-looking basis. The Company applies the low credit risk exemption allowing the Company to assume that there is no significant increase in credit risk since initial recognition of a receivable, if the receivable is determined to have low credit risk at the reporting date.

The Company measures loss allowances at an amount that represents credit losses resulting from default events that are possible within the next twelve months, unless the credit risk on a receivable balance has increased significantly since initial recognition. In the event of such significant increase in credit risk, the Company measures loss allowances for that receivable at an amount equal to its lifetime expected losses, i.e. at an amount equal to the expected credit losses that result from all possible default events over the expected life of that receivable. Any impairment losses are recorded within profit and loss in the statement of comprehensive income. The Company considers a financial asset to be in default and credit impaired when contractual payments are 90 days past due. Loans receivables from RELX companies and trade receivables are written off if past due for more than one year and are not subject to enforcement activity.

Borrowings and payables are recorded initially at fair value and subsequently carried at amortised cost (other than fixed rate borrowings in designated hedging relationships for which the carrying amount of the hedged portion of the borrowings is subsequently adjusted for the gain or loss attributable to the hedged risk).

Derivative financial instruments are used to hedge interest rate risk. Where an effective hedge is in place against changes in the fair value of fixed rate borrowings, the hedged borrowings are adjusted for changes in fair value attributable to the risk being hedged with a corresponding income or expense included in the statement of comprehensive income within net interest income. The offsetting gains or losses from remeasuring the fair value of the related derivatives are also recognised in the statement of comprehensive income within net interest income. When the related derivative expires, is sold or terminated, or no longer qualifies for hedge accounting, the cumulative change in fair value of the hedged borrowing is amortised in the statement of comprehensive income over the period to maturity of the borrowing using the effective interest method.

Where hedge accounting is applied, this is in accordance with IFRS 9 – *Financial Instruments*.
Hedge ineffectiveness can arise from:

- Differences in timing of cash flows of hedged items and hedging instruments
- Different interest rate curves applied to discount the hedged items and hedging instruments
- Derivatives used as hedging instruments having a non-zero fair value at the time of designation
- The effect of changes in counterparties' credit risk on the fair values of hedging instruments

RELX Finance B.V.
Amsterdam

The fair values of interest rate swaps represent the replacement costs calculated using observable market rates of interest. These instruments are accordingly classified as Level 2 in the IFRS 13 – *Fair Value Measurement* fair value hierarchy.

The fair value of long-term borrowings is based on quoted prices in active markets. These instruments are accordingly classified as Level 1 in the IFRS 13 – *Fair Value Measurement* fair value hierarchy.

The fair value of the loan provided to a RELX affiliate is calculated using observable market rates of interest. This instrument is accordingly classified as Level 2 in the IFRS 13 – *Fair Value Measurement* fair value hierarchy.

Transfers between levels in the fair value hierarchy, where applicable, are recognised at the end of the reporting period in which the change occurs.

- Level 1 to Level 2: Transfers from Level 1 to Level 2 occur when there is a significant decrease in the volume or level of activity for the asset or liability in the principal or most advantageous market.
- Level 2 to Level 1: Transfers from Level 2 to Level 1 occur when there is a significant increase in the volume or level of activity for the asset or liability in the principal or most advantageous market.
- Level 2 to Level 3: Transfers from Level 2 to Level 3 occur when observable inputs are no longer available or when there is a significant decrease in the reliability of observable inputs.
- Level 3 to Level 2: Transfers from Level 3 to Level 2 occur when observable inputs become available or when there is a significant increase in the reliability of observable inputs.

There were no transfers between Level 1, Level 2 and Level 3 in the fair value hierarchy in the year or prior year.

Interest income and expense

Interest income and expense are recognised in the financial statements using the effective interest rate method.

Foreign exchange translation

Transactions in foreign currencies are recorded at the rate of exchange prevailing on the date of the transaction. At the end of each reporting period, monetary assets and liabilities that are denominated in foreign currencies are retranslated at the rate prevailing on the statement of financial position date. Exchange differences arising are recorded in the statement of comprehensive income.

Significant accounting judgements, estimates and assumptions

The company does not make any material judgements and estimates when applying the accounting policies and rules for preparing the financial statements.

RELX Finance B.V.
Amsterdam

Standards and amendments effective for the year

The interpretations and amendments to IFRS effective for 2025 have not had a significant on the Company's accounting policies or reporting.

Standards, amendments and interpretations not yet effective

A number of amendments and interpretations have been issued which are not expected to have any significant impact on the Company's accounting policies or reporting. These include:

- IFRS 18 – *Presentation and Disclosure in Financial Statements* has been issued in 2024 and is effective from 1 January 2027.

3. Operating expenses

The Directors received no emoluments (2024: nil) in respect of their services.

4. Auditors' remuneration

Auditor's remuneration for the audit of the Company's financial statements and other audit engagements was as follows:

	2025	2024
	€000	€000
Audit of the financial statements	103	98
Other assurance engagements	12	64
Other assurance services from auditor's network firms	-	108
Total	115	270

5. Personnel

The Company has no employees (2024: nil).

RELX Finance B.V.
Amsterdam

6. Net interest and other finance income

	Note	2025 €000	2024 €000
Interest income from affiliate companies		97,741	107,690
Fair value gains on designated fair value hedge relationships	10	233	6
Interest and other finance income		97,974	107,696
Interest expense on term debt		(84,808)	(94,697)
Guarantee fee expense to RELX PLC		(8,415)	(8,590)
Interest and other finance expense		(93,223)	(103,287)
Net interest and other finance income		4,751	4,409

7. Tax expense

The rate of current tax is 25.8% (2024: 25.8%) based on the Dutch standard rate for corporate tax.

	2025 €000	2024 €000
Current tax	(1,571)	(1,068)
Deferred tax	424	72
Tax expense	(1,147)	(996)

The current and deferred tax liabilities comprise the following:

	Current tax liabilities €000	Deferred tax liabilities €000	Total tax liabilities €000
Balance at 1 January 2024	(1,882)	(1,898)	(3,780)
Total tax (expense)/credit for the year	(1,068)	72	(996)
Tax paid in the year	1,264	-	1,264
Balance at 1 January 2025	(1,686)	(1,826)	(3,512)
Total tax (expense)/credit for the year	(1,571)	424	(1,147)
Tax paid in the year	615	-	615
Balance at 31 December 2025	(2,642)	(1,402)	(4,044)

Tax paid via RELX Overseas B.V., as head of the fiscal unity, in the year was €615k (2024: €1,264k), which was different to the tax expense for the year set out above.

There are a number of reasons why the cash tax payments in a particular year are different from the tax expense in the accounts:

Deferred tax:

- Tax expense includes deferred tax, which is an accounting adjustment arising from temporary differences.

RELX Finance B.V.
Amsterdam

- Temporary differences occur when an item has to be included in the statement of comprehensive income in one year but is taxed in another year.

Timing differences:

- Tax payments relating to a particular year's profits are typically due partly in the year and partly in the following year.

Prior period adjustments:

- Current tax expense is the best estimate at the end of the period of cash tax expected to be paid.
- To the extent the final liability is higher or lower than the estimate, any cash tax impact will occur in a later period.

The net tax expense charged on profit before tax differs from the theoretical amount that would arise using the tax rate applicable to the accounting profit, as follows:

	2025	2024
	€000	€000
Profit on ordinary activities before taxation	4,446	3,866
Tax differences	1,644	275
Taxable profit	6,090	4,141
Current tax charge at 25.8%	(1,571)	(1,068)
Deferred tax	424	72
Tax expense	(1,147)	(996)

The increase in temporary differences primarily reflects higher capitalised bond issuance costs associated with the long-term bond issued in March 2024. These costs give rise to deductible temporary differences and have contributed to the movement in deferred tax balances for the period.

The BEPS Pillar Two Minimum Tax legislation was enacted in December 2023 in the Netherlands with effect from 2024. The Company has applied the temporary exception under IAS 12 in relation to the accounting of deferred taxes arising from the implementation of the Pillar Two rules. The new rules are not expected to have a significant impact on the tax charge for the Company.

RELX Finance B.V.
Amsterdam

8. Amounts due from RELX companies

The movements in loans made to RELX Overseas B.V. were as follows:

	2025	2024
	€000	€000
At start of period	4,149,879	4,452,498
Increase in loan amounts due from RELX Overseas B.V.	103,663	1,033,803
Decrease in loan amounts due from RELX Overseas B.V.	(89,802)	(1,336,422)
At end of year	4,163,740	4,149,879
Current receivable	760,000	-
Non-current receivable	3,403,740	4,149,879
Total	4,163,740	4,149,879

The amounts due from RELX Overseas B.V. vary over the course of each year based on its funding needs. Interest is charged on this balance at a rate that is determined by reference to the Company's own funding costs, taking into account the composition of its borrowings which comprise long-term debt and, where required, commercial paper borrowings. For the year ended 31 December 2025 the interest rate was in a range from 2.2% to 2.4% (2024: 2.4% to 2.6%). The maturity date of the loan facility is currently 31 January 2028, however the Company has the right to demand partial repayments at an earlier date if required.

On the basis of the variable nature of the loan balance and the basis on which interest is charged, the fair value of the above receivable is approximately €4.1 billion (2024: €4.0 billion).

Excluding the current portion of the loan receivable noted above, the movements in other current amounts due from RELX Overseas B.V., comprising intercompany interest receivable, were as follows:

	2025	2024
	€000	€000
At start of period	53,828	82,560
Amounts received during the year	(103,611)	(136,422)
Increase in amounts due (accrued interest)	97,741	107,690
At end of year	47,958	53,828

The fair value of the above receivables approximates to their carrying value.

The Company assesses credit risk in respect of the above intercompany receivables by applying the expected credit loss model, as described within the accounting policy for financial instruments. The Company uses ratings from the Standard & Poor's credit rating agency to determine whether the credit risk of its financial assets has significantly increased and to estimate expected credit losses.

RELX Finance B.V.
Amsterdam

Given that RELX Overseas B.V., the counterparty to the Company's receivables, is a key intermediate holding company in the RELX group, and that the Company's external borrowings are guaranteed by RELX PLC and that this guarantee could be effected through the Company's receivables, the credit rating of RELX PLC is taken to apply to RELX Overseas B.V. for this purpose.

On the basis that there is no evidence of a significant change in the credit risk of the intercompany counterparties since the loan balances were first advanced, the forward-looking analysis considers expected credit losses within twelve months of the reporting date. The loan receivable is therefore in Stage 1 in terms of IFRS 9 – *Financial Instruments*. Given the stable nature of the business activities of the counterparties and of RELX as a whole, the financial strength of RELX as evidenced by its investment grade credit rating which has been stable for several years (BBB+ from Standard & Poor's, upgraded to A- in March 2025), and the availability of funding to the group, the level of credit risk is considered to be low and stable.

The forward-looking analysis in respect of expected losses in the twelve-month period following the reporting date resulted in a credit loss adjustment that is immaterial and no amount has therefore been recorded in respect of this in either the current or prior year. See also 'Credit risk' within note 10.

9. Amounts owed to RELX companies

The amounts due to RELX companies, including intercompany guarantee fees payable and other intercompany payables, comprise:

	2025	2024
	€000	€000
Guarantee fees payable to RELX PLC	8,415	8,590
Other amounts due to RELX companies	18	405
Total	8,433	8,995

The fair value of the above payables approximates to their carrying value.

10. Financial instruments

The main financial risks faced by the Company are liquidity risk, market risk – comprising interest rate risk and, to a lesser extent, foreign exchange risk – and credit risk. Financial instruments are used to finance the Company and to manage interest rate and foreign exchange risks. The Company does not enter into speculative derivative transactions. Details of financial instruments subject to liquidity, market and credit risks are described below.

Liquidity risk

The liquidity risk is managed by RELX Overseas B.V., head of the fiscal unity and cash pooling arrangements of which the Company is a part. The remaining contractual maturities for borrowings and derivative financial instruments are shown in the table below. The table shows undiscounted principal and interest cash flows.

	Contractual cash flow							Total €000
	Carrying amount €000	Within 1 year €000	1-2 years €000	2-3 years €000	3-4 years €000	4-5 years €000	More than 5 years €000	
At 31 December 2025								
Borrowings from third parties								
Fixed rate borrowings	(4,186,101)	(833,002)	(572,689)	(865,190)	(61,188)	(61,188)	(2,222,944)	(4,616,201)
Amounts owed to RELX affiliates								
Interest rate derivative assets	(8,433)	(8,433)	-	-	-	-	-	(8,433)
Trade and other payables	11,638	5,691	4,581	2,595	1,175	44	13,789	27,874
Total	(4,182,999)	(835,847)	(568,108)	(862,595)	(60,013)	(61,144)	(2,209,155)	(4,596,862)

	Contractual cash flow							Total €000
	Carrying amount €000	Within 1 year €000	1-2 years €000	2-3 years €000	3-4 years €000	4-5 years €000	More than 5 years €000	
At 31 December 2024								
Borrowings from third parties								
Fixed rate borrowings	(4,195,731)	(125,340)	(832,999)	(572,686)	(865,186)	(61,187)	(2,284,121)	(4,741,519)
Amounts owed to RELX affiliates								
Interest rate derivative assets	(8,995)	(8,995)	-	-	-	-	-	(8,995)
Trade and other payables	25,976	3,908	6,450	5,306	4,487	4,082	19,203	43,436
Total	(4,178,848)	(130,525)	(826,549)	(567,380)	(860,699)	(57,105)	(2,264,918)	(4,707,176)

The carrying amount of derivative financial assets comprises €11,638k (2024: €25,976k) in respect of fair value hedges which have been classified as non-current in the statement of financial position. See 'Hedge accounting' below.

Market risk

The Company's primary market risks are to interest rate fluctuations and exchange rate movements. Derivatives are used to manage the risks associated with interest rate and exchange rate movements and the Company does not enter into speculative derivatives. Derivatives used by the Company for hedging a particular risk are not specialised and are generally available from numerous sources.

RELX Finance B.V.
Amsterdam

Interest rate exposure management

The interest rate exposure management policy of RELX (of which the Company is a part) aims to minimise interest costs with an acceptable level of year on year volatility. In this context, RELX issues fixed rate and floating rate borrowings and uses interest rate swaps where applicable. Interest rate derivatives are used only to hedge an underlying risk and no net market positions are held.

At 31 December 2025, 82% (2024: 82%) of gross borrowings were at fixed rate, excluding those in a fair value hedge relationship. The Company charges interest on the loans it makes to affiliate companies at a blended rate based on its own actual funding costs. A reduction or increase in interest rates would not therefore result in a significant change in the Company's net interest income because the interest charged on the loans to affiliate companies would also change in proportion where applicable.

The impact on net equity of a theoretical change in interest rates as at 31 December 2025 is nil (2024: nil). The impact of a change in interest rates on the carrying value of fixed rate borrowings in a designated fair value hedge relationship would be offset by the change in carrying value of the related interest rate derivative. Fixed rate borrowings not in a designated hedging relationship are carried at amortised cost.

Foreign currency exposure management

The Company does not have significant exposure to foreign exchange risk because the majority of its borrowings and all of the amounts receivable from affiliate companies are denominated in Euros, the Company's functional currency. The Company has no other significant transactions denominated in foreign currencies.

Credit risk

The Company lends all the funds raised through its external borrowings to an affiliate company within RELX and therefore has a credit risk exposure if the affiliate company is unable to repay the amounts lent by the Company. The maximum credit exposure equates to the carrying value of the amounts receivable. This credit risk is considered acceptable given the size and financial strength of RELX, as evidenced by its solid investment grade credit rating. In addition, RELX has access to a \$3,500 million (€2,982 million) committed bank facility maturing in November 2030. This facility was entered into in November 2025 on cancellation of the previous committed bank facility. At 31 December 2025, this facility was undrawn and could therefore be used in full by the counterparty to the Company's intercompany loan receivable to repay a significant proportion of those borrowings to the Company.

As at 31 December 2025, there were no loans from affiliate companies that were past due (2024: nil).

The Company has a credit risk from the potential non-performance by the counterparties to the derivative financial instruments described above, which are unsecured. The amount of this credit risk is normally restricted to the amounts of any hedge gain (as presented within derivative financial assets in the statement of financial position) and not the principal amount being hedged. The Company also has a credit exposure to its bank counterparties for the full principal amount of cash and cash equivalents.

RELX Finance B.V.
Amsterdam

Hedge accounting

The hedging relationships that are designated under IFRS 9 – *Financial Instruments* are described below:

Fair value hedges

The Company has entered into interest rate swaps to hedge the exposure to changes in the fair value of fixed rate borrowings due to interest rate movements which could affect the statement of comprehensive income. The table below details the designated fair value hedge relationships that were in place at 31 December 2025, swapping fixed rate term debt issues denominated in Euros to floating rate Euro debt for the whole of their term, together with the related fixed and floating rates.

	2025 Principal amount €000	2024 Principal amount €000	Fixed rate	Floating rate
€750 million public notes and €750 million interest rate swaps maturing 2031	750,000	750,000	3.75%	EURIBOR +0.9%
Total	750,000	750,000		

The gains and losses on the borrowings and related derivatives designated as fair value hedges, which are included in the statement of comprehensive income as part of net interest and other finance income, together with the total carrying values of the borrowings and related derivatives included in the statement of financial position, for the two years ended 31 December 2025 were as follows:

	1 January 2024 €000	Fair value movement gain/(loss) €000	31 December 2024 €000	Fair value movement gain/(loss) €000	31 December 2025 €000	Carrying values €000
Debt	(18,831)	(8,246)	(27,077)	14,571	(12,506)	(761,367)
Related interest rate swaps	17,724	8,252	25,976	(14,338)	11,638	11,638
Net (loss)/gain on borrowings and related derivatives/total carrying value	(1,107)	6	(1,101)	233	(868)	(749,729)

All fair value hedges were highly effective throughout the period from inception to 31 December 2025. The hedge ineffectiveness of €233k (2024: €6k) was recognised in the line ‘fair value gains on designated fair value hedge relationships’ within net interest and other finance income. The fair value adjustments to the carrying value of the debt due to interest rate risk (being the designated risk component) historically accounted for on average approximately 58% of the changes in fair value of the debt as a whole.

11. Borrowings

	2025			2024		
	Falling due within 1 year €000	Falling due in more than 1 year €000	Total €000	Falling due within 1 year €000	Falling due in more than 1 year €000	Total €000
Financial liabilities measured at amortised cost:						
Term debt	749,600	2,633,123	3,382,723	-	3,377,659	3,377,659
Term debt in fair value hedging relationships	-	761,367	761,367	-	775,732	775,732
Interest payable on borrowings	42,011	-	42,011	42,340	-	42,340
Total	791,611	3,394,490	4,186,101	42,340	4,153,391	4,195,731

The total fair value of borrowings measured at amortised cost is €3,286 million (2024: €3,256 million). The total fair value of borrowings in fair value hedging relationships is €772 million (2024: €777 million). These amounts exclude the interest payable on borrowings.

The Company's term debt borrowings which are held at a fixed rate of interest, and therefore measured at amortised cost, comprise of the following:

	2025 €000	2024 €000
1.375% €750 million public notes 2026	749,600	748,257
1.500% €500 million public notes 2027	499,451	498,994
0.500% €800 million public notes 2028	797,242	796,016
0.875% €500 million public notes 2032	495,613	494,911
3.375% €850 million public notes 2033	840,817	839,481
Total	3,382,723	3,377,659

RELX Finance B.V.
Amsterdam

The Company's term debt borrowings which have been swapped to a floating rate of interest in fair value hedge relationships, and therefore measured at amortised cost with an additional fair value adjustment reflecting changes in the hedged (interest rate) risk, comprise of the following:

	2025 €000	2024 €000
3.750% €750 million public notes 2031	761,367	775,732
Total	761,367	775,732

12. Statement of cash flows and reconciliation of net borrowings

Reconciliation of administrative expenses to other cash used in operations	2025 €000	2024 €000
Administrative expenses	(305)	(543)
(Decrease)/increase in payables	(382)	407
Other cash used in operations	(687)	(136)

	Cash and cash equivalents €000	Net amounts due from RELX companies €000	Borrowings €000	Related derivative financial instruments €000	Total 2025 €000	Total 2024 €000
At start of year	44	4,194,712	(4,153,391)	25,976	67,341	43,215
Decrease in cash and cash equivalents	(9)	-	-	-	(9)	(59)
Increase/(decrease) in net amounts due from RELX companies	-	8,553	-	-	8,553	(331,896)
Issuance of term debt	-	-	-	-	-	(838,642)
Repayment of term debt	-	-	-	-	-	1,200,000
Change in net borrowings resulting from cash flows	(9)	8,553	-	-	8,544	29,403
Fair value and other adjustments to borrowings and related derivatives	-	-	9,301	(14,338)	(5,037)	(5,277)
At end of year	35	4,203,265	(4,144,090)	11,638	70,848	67,341

There was no issuance under the Company's commercial paper programmes in 2025 and no commercial paper was outstanding at the beginning or end of the year.

13. Shareholders' equity

Issued share capital

The issued share capital of the Company amounts to €1, divided into 100 ordinary shares of €0.01 each. The total number of issued shares is 100.

RELX Finance B.V.
Amsterdam

Reserves

The Company's reserves comprise the following:

	Net Profit	Reserves	Total
	€000	€000	€000
Balance at 1 January 2024	1,200	17,321	18,521
Total comprehensive income for the year	2,870	-	2,870
Transfer of net profits to reserves	(1,200)	1,200	-
Balance at 1 January 2025	2,870	18,521	21,391
Total comprehensive income for the year	3,299	-	3,299
Transfer of net profits to reserves	(2,870)	2,870	-
Balance at 31 December 2025	3,299	21,391	24,690

14. Related party transactions

The Company has related party transactions with entities that are part of RELX. Transactions were made on normal market terms of trading and comprise the rendering and receiving of services totaling €172k (2024: €163k).

Interest income on amounts owed by RELX companies was €97,974k (2024: €107,696k) and guarantee fee expense to the guarantor RELX PLC was €8,415k (2024: €8,590k). As at 31 December 2025, amounts owed by RELX companies were €4,211,698k (2024: €4,229,683k), amounts due to RELX PLC were €8,415k (2024: €8,590k) and amounts due to other RELX companies were €18k (2024: €242k). Key management personnel are also related parties as defined by IAS24 – *Related Party Disclosures* and comprise the Directors of the Company. There were no transactions with key management personnel.

15. Contingent liabilities

The Company is part of a fiscal unity for corporate income tax and for that reason it is jointly and severally liable for the tax liabilities of the fiscal unity as a whole. The head of the fiscal unity is RELX Overseas B.V.

16. Profit appropriation

The Board of Directors proposes that the result for the year ended 31 December 2025 amounting to €3,299k should be retained in reserves without payment of dividend.

17. Subsequent events

The Board of Directors have determined that there are no subsequent events requiring disclosure.

Independent auditor's report

To: the shareholder and audit committee of RELX Finance B.V.

Report on the audit of the financial statements 2025 included in the annual report

Our opinion

We have audited the accompanying financial statements 2025 of RELX Finance B.V. based in Amsterdam, the Netherlands.

In our opinion the financial statements give a true and fair view of the financial position of RELX Finance B.V. as at 31 December 2025 and of its result and its cash flows for 2025 in accordance with International Financial Reporting Standards as adopted in the European Union (EU-IFRSs) and with Part 9 of Book 2 of the Dutch Civil Code.

The financial statements comprise:

- The statement of financial position as at 31 December 2025
- The following statements for 2025: the statement of comprehensive income, changes in equity and cash flows
- The notes comprising material accounting policy information and other explanatory information

Basis for our opinion

We conducted our audit in accordance with Dutch law, including the Dutch Standards on Auditing. Our responsibilities under those standards are further described in the Our responsibilities for the audit of the financial statements section of our report.

We are independent of RELX Finance B.V. in accordance with the Wet toezicht accountantsorganisaties (Wta, Audit firms supervision act), the Verordening inzake de onafhankelijkheid van accountants bij assurance-opdrachten (ViO, Code of Ethics for Professional Accountants, a regulation with respect to independence) and other relevant independence regulations in the Netherlands. Furthermore, we have complied with the Verordening gedrags- en beroepsregels accountants (VGBA, Dutch Code of Ethics for Professional Accountants).

We believe the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Information in support of our opinion

We designed our audit procedures in the context of our audit of the financial statements as a whole and in forming our opinion thereon. The following information in support of our opinion and any findings were addressed in this context, and we do not provide a separate opinion or conclusion on these matters.

Our understanding of the business

RELX Finance B.V. (the Company) is incorporated as a wholly-owned subsidiary of RELX PLC to assist RELX PLC to raise funds, including the issue of bonds, loan notes, promissory notes or other securities, to finance affiliates in the group comprising RELX PLC and its subsidiaries, joint ventures and associates (RELX). RELX, of which the Company is a part, maintains a range of borrowing facilities and debt programmes to fund its funding requirements at competitive rates. Debt is issued to meet the funding requirements of various jurisdictions and in the currency that is needed, recognising that debt can act as a natural hedge of earnings and net assets in currencies other than the RELX reporting currency. The Company was set up during 2015 to enable an increased proportion of RELX's debt portfolio to be issued and denominated in Euros, to better match the currency mix of earnings and operating cash flows. The Company funds itself primarily with a portfolio of long-term borrowings, mainly issued in the Eurobond market. It also maintains Euro Commercial Paper and US Commercial Paper programmes under which it issues short-term borrowings based on its funding needs. All of the Company's long-term and Commercial Paper borrowings are fully and unconditionally guaranteed by RELX PLC, the Company's ultimate parent company.

We paid specific attention in our audit to areas driven by the operations of the Company and our risk assessment.

We determined materiality and identified and assessed the risks of material misstatement of the financial statements, whether due to fraud or error in order to design audit procedures responsive to those risks and to obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion.

Materiality

Materiality	€42 million (2024: €42 million)
Benchmark applied	1% of total assets as at 31 December 2025 (2024: 1% of total assets).
Explanation	<p>We determined materiality based on our understanding of the Company's business and our perception of the financial information needs of users of the financial statements. We considered that total assets reflects the source of income and repayments to the holders of the bonds and the commercial paper issued by the Company and other lenders.</p> <p>We determined materiality to be consistent with prior financial year.</p>

We have also taken into account misstatements and/or possible misstatements that in our opinion are material for the users of the financial statements for qualitative reasons.

We agreed with the audit committee that misstatements in excess of €2.1 million, which are identified during the audit, would be reported to them, as well as smaller misstatements that in our view must be reported on qualitative grounds.

Teaming and use of specialists

We ensured that the audit team included the appropriate skills and competences which are needed for the audit of a listed finance company. We included specialists on our team in the areas of the expected credit loss assessment regarding the valuation of the loan issued and IFRS 9.

Our focus on fraud and non-compliance with laws and regulations

Our responsibility

Although we are not responsible for preventing fraud or non-compliance and we cannot be expected to detect non-compliance with all laws and regulations, it is our responsibility to obtain reasonable assurance that the financial statements, taken as a whole, are free from material misstatement, whether caused by fraud or error. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

Our audit response related to fraud risks

We identified and assessed the risks of material misstatements of the financial statements due to fraud. During our audit we obtained an understanding of the Company and its environment and the components of the system of internal control, including the risk assessment process and management's process for responding to the risks of fraud and monitoring the system of internal control and how the audit committee exercises oversight, as well as the outcomes.

We refer to section "Risk management" of the directors' report for management's (fraud) risk assessment.

We evaluated the design and relevant aspects of the system of internal control and in particular the fraud risk assessment, as well as the RELX PLC code of conduct, whistle blower procedures and incident registration. We evaluated the design and the implementation of internal controls designed to mitigate fraud risks.

As part of our process of identifying fraud risks, we evaluated fraud risk factors with respect to financial reporting fraud, misappropriation of assets and bribery and corruption. We evaluated whether these factors indicate that a risk of material misstatement due to fraud is present.

We incorporated elements of unpredictability in our audit. We also considered the outcome of our other audit procedures and evaluated whether any findings were indicative of fraud or non-compliance.

We addressed the risks related to management override of controls, as this risk is present in all organizations. For these risks we have, among other things, performed procedures to evaluate whether the selection and application of accounting policies by the Company, particularly those relating to subjective measurements and complex transactions as disclosed in section "Financial instruments" in Note 2 to the financial statements may be indicative to fraudulent financial reporting. This includes the measurement of expected credit losses. We refer to our audit response in the key audit matter "Valuation of the loan issued".

Furthermore, we have used data analysis to identify and address high-risk journal entries and other adjustments made in the financial reporting process. We evaluated the business rationale (or the lack thereof) of significant extraordinary transactions and transactions with related parties. We also evaluated whether transactions with related parties were accounted for at-arm's length and in accordance with transfer pricing documentation.

We did not identify a risk of fraud in revenue recognition, other than the risks related to management override of controls.

We considered available information and made enquiries of relevant executives, directors, the audit committee and the group auditor of RELX PLC.

The fraud risk we identified, enquiries and other available information did not lead to specific indications for fraud or suspected fraud potentially materially impacting the view of the financial statements.

Our audit response related to risks of non-compliance with laws and regulations

We performed appropriate audit procedures regarding compliance with the provisions of those laws and regulations that have a direct effect on the determination of material amounts and disclosures in the financial statements. Furthermore, we assessed factors related to the risks of non-compliance with laws and regulations that could reasonably be expected to have a material effect on the financial statements from our general industry experience, through discussions with management, reading minutes, inspection of reports, and performing substantive tests of details of classes of transactions, account balances or disclosures.

We also inspected lawyers' letters and we have been informed by management that there was no correspondence with regulatory authorities, enquired with the group auditor of RELX PLC and remained alert to any indication of (suspected) non-compliance throughout the audit. Finally we obtained written representations that all known instances of non-compliance with laws and regulations have been disclosed to us.

Our audit response related to going concern

As disclosed in section "Going concern" in Note 2 to the financial statements, the financial statements have been prepared on a going concern basis. When preparing the financial statements, management made a specific assessment of the Company's ability to continue as a going concern and to continue its operations for the foreseeable future.

We discussed and evaluated the specific assessment with management exercising professional judgment and maintaining professional skepticism. We considered whether management's going concern assessment, based on our knowledge and understanding obtained through our audit of the financial statements or otherwise, contains all relevant events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion.

Based on our procedures performed, we did not identify material uncertainties about going concern or management's use of the going concern basis of accounting. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause a company to cease to continue as a going concern.

Our key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements. We have communicated the key audit matter to the audit committee. The key audit matter is not a comprehensive reflection of all matters discussed.

In comparison with previous year, our key audit matter did not change.

Valuation of the loan issued	
Risk	<p>The Company is exposed to the risk that the group companies, RELX Overseas B.V. (borrower) and RELX PLC (guarantor) both default on meeting its obligations. As loans issued to the group company (current and non-current portion of the amounts due from RELX group companies) represent the most significant portion of the Company's current and non-current assets, a default may have a material impact on the Company's financial position and results.</p> <p>We consider the valuation of the loans issued to RELX companies and determination of the expected credit losses a key audit matter because this is an area that involves significant judgment and determines the ability of the Company to fulfil its obligations and to continue as a going concern.</p> <p>We refer to section "Financial instruments" in Note 2 to the financial statements, where management disclosed the policies and procedures in respect of the expected credit loss assessment on loans issued to the group company. Management concluded that the calculated impact of expected credit loss is not material as at 31 December 2025 and therefore decided not to recognize an allowance for expected credit losses in the financial statements, as disclosed in Note 8 to the financial statements, including credit risk.</p>
Our audit approach	<p>Our audit procedures included, amongst others, evaluating the appropriateness of the Company's accounting policies related to recognition of expected credit losses in accordance with IFRS 9 "Financial Instruments", and the low credit risk simplification of paragraph 5.5.10 in particular. We evaluated whether the accounting policies and methods applied for making estimates have been applied consistently. We also evaluated the design of internal controls of the processes underlying the estimation process insofar relevant to our audit of the financial statements.</p> <p>In order to verify that management appropriately measured the loss allowance at an amount equal to 12-month expected credit losses, instead of the lifetime expected credit losses, we:</p> <ul style="list-style-type: none"> ▪ Evaluated the financial position of the group companies and determined that the group companies have met their financial obligations towards the Company throughout the year and up to the date of this report ▪ Verified the most recent ratings assigned by an external credit rating agency to the group company, RELX PLC, in order to determine that the credit risk has not increased significantly since the loans were issued to the group company RELX Overseas B.V. <p>Furthermore, we have performed the following substantive audit procedures:</p> <ul style="list-style-type: none"> ▪ Confirming our understanding of the Company's data, assumptions and method used to determine the expected credit losses on the loans issued to the group company

Valuation of the loan issued

	<ul style="list-style-type: none"> ▪ Challenging whether management's conclusion that the calculated expected credit losses are immaterial is appropriate in the circumstances and adequately disclosed ▪ Evaluating the accuracy and completeness of the relevant disclosures in accordance with the relevant paragraphs and application guidance of IFRS 7: "Financial instruments: disclosures" ▪ Inspecting the bank statements for cash receipts for amounts received from RELX companies to repay the maturing bonds as they fall due ▪ Comparing inputs and assumptions used by the management for the expected credit losses calculation with those produced by independent credit rating provider and other publicly available sources ▪ Involvement of EY specialists to develop own point estimate to validate whether the expected credit losses calculated by management remains to be in line with IFRS 9 "Financial Instruments" and market practice ▪ Performing audit procedures over the groupwide going concern conclusion over the ultimate parent RELX PLC as audited by Ernst & Young LLP (EY UK), including inspection of the 2025 annual report (including the future outlook and financial statements of RELX PLC) and inspection of the key audit matters reported in the RELX PLC auditor's opinion
Key observations	We concur with management's conclusion that the calculated impact of expected credit losses is not material for the financial statements as a whole.

Compliance with SBR Regulatory Technical Standard, including XBRL mark-ups, unaudited

We did not examine the compliance with the requirements of the Regulatory Technical Standard of the SBR domain Trade Register (including the applied eXtensible Business Reporting Language (XBRL) mark-ups) and, accordingly, do not express an opinion thereon.

Report on other information included in the annual report

The annual report contains other information in addition to the financial statements and our auditor's report thereon.

Based on the following procedures performed, we conclude that the other information:

- Is consistent with the financial statements and does not contain material misstatements
- Contains the information as required by Part 9 of Book 2 of the Dutch Civil Code for the management report and the other information as required by Part 9 of Book 2 of the Dutch Civil Code

We have read the other information. Based on our knowledge and understanding obtained through our audit of the financial statements or otherwise, we have considered whether the other information contains material misstatements. By performing these procedures, we comply with the requirements of Part 9 of Book 2 of the Dutch Civil Code and the Dutch Standard 720. The scope of the procedures performed is substantially less than the scope of those performed in our audit of the financial statements.

The board of directors are responsible for the preparation of the other information, including the management report in accordance with Part 9 of Book 2 of the Dutch Civil Code and other information required by Part 9 of Book 2 of the Dutch Civil Code.

Description of responsibilities regarding the financial statements

Responsibilities of the directors and the audit committee for the financial statements

The board of directors are responsible for the preparation and fair presentation of the financial statements in accordance with EU-IFRSs and Part 9 of Book 2 of the Dutch Civil Code. Furthermore, the board of directors is responsible for such internal control as management determines is necessary to enable the preparation of the financial statements that are free from material misstatement, whether due to fraud or error.

As part of the preparation of the financial statements, the board of directors is responsible for assessing the Company's ability to continue as a going concern. Based on the financial reporting framework mentioned, the board of directors should prepare the financial statements using the going concern basis of accounting unless the board of directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so. The board of directors should disclose events and circumstances that may cast significant doubt on the Company's ability to continue as a going concern in the financial statements.

The audit committee is responsible for overseeing the Company's financial reporting process.

Our responsibilities for the audit of the financial statements

Our objective is to plan and perform the audit engagement in a manner that allows us to obtain sufficient and appropriate audit evidence for our opinion.

Our audit has been performed with a high, but not absolute, level of assurance, which means we may not detect all material misstatements, whether due to fraud or error during our audit.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements. The materiality affects the nature, timing and extent of our audit procedures and the evaluation of the effect of identified misstatements on our opinion.

We have exercised professional judgment and have maintained professional skepticism throughout the audit, in accordance with Dutch Standards on Auditing, ethical requirements and independence requirements. The Information in support of our opinion section above includes an informative summary of our responsibilities and the work performed as the basis for our opinion.

Our audit further included among others:

- Performing audit procedures responsive to the risks identified, and obtaining audit evidence that is sufficient and appropriate to provide a basis for our opinion
- Obtaining an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control

- Evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management
- Evaluating the overall presentation, structure and content of the financial statements, including the disclosures
- Evaluating whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation

Communication

We communicate with the audit committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant findings in internal control that we identify during our audit.

We provide the audit committee with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the audit committee, we determine the key audit matters: those matters that were of most significance in the audit of the financial statements. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, not communicating the matter is in the public interest.

Report on other legal and regulatory requirements

Engagement

We were engaged by management as auditor of RELX Finance B.V. on 9 February 2017, as of the audit for the year 2016 and have operated as statutory auditor ever since that date.
