

## Sustainability Reporting Policy - 2021

RELX follows the Global Reporting Initiative (GRI) Standards: Core Option in reporting on its sustainability performance. We also map key issues to the United Nations Sustainable Development Goals (SDGs). During 2021, and in our 2021 Annual Report and 2021 Corporate Responsibility Report, we intend to incorporate industry-specific elements of the Sustainability Accounting Standards Board (SASB) into our sustainability reporting.
